We beg to draw your attention to the fact that our fruit-tree-seeds are positively of the new crop and of best quality. This is especeally the case with the Apple and Pear-seeds, which are distinguished by **particular strenght of growth** and which are by far better than the French seeds.

One of our American friends writes in this connection: „**We personally prefer by much the Austrian seed of Apples and Pears to the French.** This latter gets worse and worse from one year to the other and it is **only a question of time** when the dissatisfaction with it will become general.

Ask detailed prospectus

DEAR SIR,

Wiener=Neustadt, August 1927

We beg to observe expressly that all seeds quoted in our pricelist are from the crop 1927 and collected by our own collectors.

Our god reputation spread far over Europe and your country warrants the first class quality of our seeds.

Though the crop prospects are very bad, in consequence of heavy frosts and storms during the blossom and also later on, we have done our utmost in quoting you only lowest prices in order to induce you to give us a trial order.

Should it happen, contrary to our expectation that one or the other of our prices would appear you too high, kindly consider that a really first class seed will surely make up for a somewhat higher price.

Please find below some of the recent acknowledgements of your country which will show you that our seeds are favourites with your fellow-countrymen.

We hope to be favoured with your valuable orders and beg to remain, dear Sirs,

Very truly yours

WR.-NEUSTÄDTER
